# Maya Lynn Cohen

I was born in Washington State but shortly after my 3rd birthday my family and I moved to Switzerland. I grew up speaking English, Swiss German and French. After High School I spend 3 years in business school and a 4th year as an administrative assistant. It was during this time that I first discovered my interest in coding on the side of school and work.

In 2019, after spending 3 months traveling Europe and the Philippines, I moved back to Washington. Shortly after, the pandemic forced me into unemployment in order to take care of family. After things calmed down I moved to Seattle for a contracting job where I got first hand experience with computer hardware, screen repairs and some other IT work.

After learning the basics of html, CSS and JavaScript through free online classes and apps, I realized it was more than just a hobby. In 2022 I signed up for the University of Washington Web Developer Bootcamp. I was able to learn all the skills in depth and have come further than I imagined in this short time.

Visit my portfolio section to see all my projects. You can send me an email under the contact me tab. And if you'd like to know more about my skills, click the resume tab or go to my GitHub or Linked in below

**Coding skills**

- HTML
- CSS
- JavaScript
- Bootstrap and other frameworks
- MySql and Sequelize
- MongoDB and Mongoose
- Express server setup
- Handlebars
- React

**Work Skills:**

- Problem Solving
- Small Project Management
- Attention to detail
- Knowledge Seeking
- Positive Thinking
- High interest and understanding of Math
- Persistence
- Creativity
